I am pleased to present this latest version of the Information Technology department annual master plan for Fiscal Year 2021. The following pages will provide information, not only on the projects that the department will undertake in the next year but also provide a status report of this past year's projects. In addition, the report will provide information about the operational tasks that are performed by IT department staff in order to maintain the complicated infrastructure used every day by tens of thousands of faculty, staff, and active and prospective students.

This document is the culmination of a yearlong process that makes use of quarterly meetings with all major departments to identify their needs for support from the IT department. This process ensures that the work of the Information Technology department is in line with the priorities of the college and that there is a shared vision of what those priorities are and how they link to the college's mission.

For the 2021 Fiscal Year we have identified 127 projects through this process. A full list of all projects can be viewed, starting on page 4, categorized by the strategic initiative that each project supports. In other sections of the report we also provide information on the number of projects from each division as well as the distribution of projects related to the college's core strategies, IT functions, etc.

I hope the information this document provides will be useful in helping you to understand the work that we do in Information Technology and shed light into areas that are not always visible. If there is anything you would like additional information on, or suggestions you would like to make, feel free to contact me.
